PROFILE

01
ABOUT ME

Character performance animator for games, film, and TV. Born in Shanghai, China, I am completing four years of undergraduate study in the United States. I animate acting and lip-sync performances with believable weight and push-pull mechanics, and I complete the full 3D pipeline myself. I communicate clearly in a team and keep my assets organized for handoff. I speak Mandarin and English.

02
EDUCATION

RINGLING COLLEGE OF ART + DESIGN

BFA in Computer Animation | August 2023 - expected 2027

EXPERIENCE

03
PROJECT EXPERIENCE

DRAMA QUEEN

Character: White | January - May 2026 | Course project

- Created a modern teen comedy: a teacher interrupts a woman's story of her hated husband's death, revealing a school theater audition
- Designed the character, storyboarded, gathered reference, and recorded video reference
- Modeled and textured a stylized character in ZBrush, Maya, and Substance Painter, with a different costume model for each scene
- Rigged body and face with AdvancedSkeleton, plus prop rigs for her glasses and a photo frame; groomed hair in XGen and simulated her skirt in nCloth, the hardest parts
- Animated lip-sync and the creative highlight: switching between her imagined role and her real self through performance and costume modeling
- Lit and rendered in Arnold, composited in Nuke, edited in Premiere

GECKO MAIL

Character: Rory | September - December 2025 | Course project

BEST OF RINGLING AWARD

- Created a story in a Nordic-inspired fictional world: on a cold day, a gecko mail carrier opens a metal mailbox with his tongue, which sticks to the frozen metal
- Designed the character, storyboarded, gathered reference, and recorded video reference
- Modeled and textured a stylized character in ZBrush, Maya, and Substance Painter
- Rigged body and face with AdvancedSkeleton, adding blendshapes for extreme poses and an IK/FK tongue rig
- Animated the creative highlight, Rory's stuck-tongue struggle, with push-pull mechanics and believable weight, studying the pull with a stretchy elastic cord
- Lit and rendered in Arnold, composited in Nuke, edited in Premiere

04

WORK EXPERIENCE

COMMERCIAL EDITING INTERN

E-commerce company, Shanghai, China | July 2024

- Edited 15+ short promotional videos (20–40 seconds each) per day in CapCut
- Wrote video scripts supporting visual promotion and brand messaging
- Collaborated with marketing teams to review footage and develop video concepts

05

SKILLS

- **Character performance and acting:** story-driven acting with clear A-to-B poses
- **Lip-sync:** dialogue animation in 3D and 2D
- **Weight and push-pull mechanics:** believable weight in characters and objects
- **Full 3D pipeline:** design, modeling, texturing, rigging, hair and cloth, animation, lighting, rendering, compositing, editing
- **2D animation:** Photoshop and Animation Paper
- **Soft skills:** communication, adaptability, organized asset management, problem solving
